

Films for self-adhesive labels: SP serie

Coextruded polyethylene film with high rigidity and very high gloss produced by ITP Spa intended for the realization of self-adhesive labels. Available white and transparent.

Key features

ITP's advanced and state-of-the-art technology allows to obtain a very high flatness of the roll and a perfect glossy surface of the film. The films of the SP series are made with raw materials complying with the European Community standards relating to food contact. More

detailed information is available upon request.

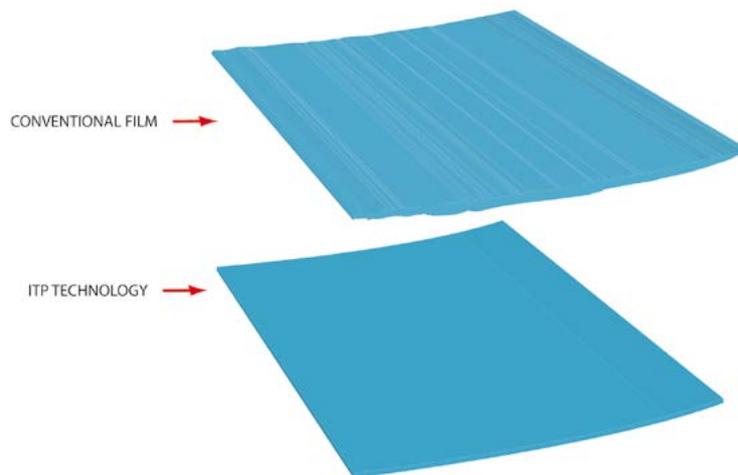

The quality of these films is ensured by the extensive experience gained by ITP in the production of specialty materials for packaging, and assisted by the quality certification ISO 9001 since 1993.

CHARACTERISTICS		METHOD	UNITS	VALUE*
Total thickness		CTR 109	µm	45 - 150
Grammage		ITP	g/m ²	43-150
Density (for white films)		---	g/m ³	0,952 - 0,999
Light transmission (white films)		ASTM D-1003	%	~33
Tensile strength at break	Long MD	ASTM-D882	N/mm ²	>15
	Trans TD			> 14
Elongation at break	Long MD	ASTM-D882	%	>200
	Trans TD			>200
COF		ASTM D-1894	-	0,50

**these values are indicative but not limitative of the typical characteristics of the film. Exceptions to the reported values can be achieved.*

INNOVATIVE PACKAGING SOLUTIONS

Warning

Storage precautions

Keep the rolls in their original packaging in dry environment, protected from sunlight and atmosphere agents, at a temperature of 20 (+/-10) °C. Store the material in surrounding environment at least 24hours before using.

Recommended use (shelf life): within 6 months from production date. Exceptions to this period, when the material is correctly stored, have been successfully experimented.

Precautions for use

The information provided in this publication has to be considered true and accurate at the time of publication; the data are average figures for the ideal use of our material. They have been obtained using laboratory specimens and equipments . The publication of this information, however, does not represent a guarantee for further delivery.

The customer should take care to determine the suitability of such product for the intended use.
